

On the evening of **Thursday 16th March** pupils from Years 5 and 6 enjoyed the third in this year's series of 'How Our World Works' Evening Talks. Our guest speaker was **Dr Olwyn Menzies**, former research scientist and meteoriticist who spoke about her work to uncover the mysteries of primitive meteorites.

After the talk, pupils took the opportunity to take a closer look at an assortment of photographs of Dr Menzies's desert travels in search of meteorites and examined specimens of meteorites and some meteo-wrongs!

Thank you to everyone who attended, including pupils and parents from All Cannings School, and an especially big **THANK YOU** to Dr Menzies for a fascinating insight into the world of a meteoriticist.
