

GLOBAL WEEK

| Monday 2nd October - Friday 6th October |

Festivals and Celebrations

This year each class will study an area of the world to learn about their festivals and celebrations. This newsletter will give you more information about the week.

All classes are currently studying a geography topic and their learning throughout the week will further develop the children's understanding of their place in the world as well as learning more about other cultures and traditions. During Global Week each class will have a focus area as follows:

Oak - India 🇮🇳

Sycamore - Australia 🇦🇺

Maple - Spain 🇪🇸

Cherry - Europe

Elm - South America

Willow - Brazil 🇧🇷

On Wednesday all classes will become scientists and think scientifically about food/food chains. Classes will either make food or taste food from their country and I'm sure Class teachers will be grateful for offers of help to cook with the children. If you have any resources or specific experience with festivals in these areas of the world that you would like to share with the

children then please contact class teachers directly (Elm Class already have lots of offers so thank you).

Thursday morning will be a colourful affair with all classes taking part in a Woodborough style Holi Festival. During the course of the morning each child will have the opportunity to throw powder paint at a large canvas which will be displayed in school. We'll need plenty of buckets to store the powder and have cleaning stations for the children so please bring any donations to me in Maple Class.

We'll finish the week with a whole meeting starting at 2:30pm on Friday where each class will show some of their work from the week. Please check our Twitter account @w_woodborough and Class blogs regularly for immediate updates throughout the week.

This is sure to be a memorable week for the children. Many thanks for your continued support.

Mrs Johanson,

Subject Leader for Geography
